

SATELLITE EDUCATION PROGRAM

Registration Required
No Fee

Presented by Samsung

MAX: 475 PARTICIPANTS

Register online to secure an available spot.

In order to register for this virtual webinar, the attendee must agree to allow AMSSM to share your preferred mailing address and email address with HydroCision, Inc.

OPTIONAL VIRTUAL INDUSTRY-SPONSORED WEBINAR

Tuesday, April 18, 2023 • 7:00pm - 8:00pm CT

Can Sports Medicine Physicians Do More to Treat Chronic Tendinopathy?

Yes, sports medicine physicians could play a pivotal role in improving patient care for chronic tendinopathy.

If you are in an orthopedic practice, you probably see hundreds of tendinopathy patients every month. Many of these patients find relief with conservative care. However, 5-10% of these patients fail to find relief even with continued conservative care resulting in increased dissatisfaction for the provider and the patient.

If you would like to learn about advanced treatment options available to chronic tendinopathy patients, please register for this webinar.

During this webinar, you will learn about using TenJet™ to address tendon thickening, calcifications, and other tissue pathology associated with chronic tendinopathy. The speakers will share their experience, technique and rehabilitation pearls, and case examples in the following areas:

- Recalcitrant lateral hip pain
- Tendinosis in the foot & ankle
- Tendinosis in the upper extremity

TenJet™ is the next frontier in advanced ultrasound-guided interventions!

Please register to learn more and bring this advanced treatment option to your patients and community.

FEATURED SPEAKERS:

Nathan Holmes, MD
Sports Medicine Physician
Reconstructive Orthopedics

Dominic King, DO, CAQSM, FAOASM, FAMIA
